### **SunPower Joins SLO Green Build**

San Luis Obispo, CA – November 2009. SunPower Corporation (NASDAQ: SPWRA, SPWRB) recently exhibited its commitment to our local community by joining SLO Green Build as a Redwood Member, the non-profit's highest level of membership. SunPower designs, manufactures, delivers, and monitors high-performance solar electric systems worldwide for residential, commercial, and utility customers.

SunPower shares SLO Green Build's belief that San Luis Obispo County is one of the most precious places on earth and shares its commitment to using the most sustainable development methods and greenest building materials possible. As a new corporate citizen of the County, SunPower is honored to join and participate in the organization's tradition of grass-roots involvement and volunteerism among its membership and the community. The company's membership in SLO Green Build is an acknowledgement and endorsement of the organization's vision that "in a sustainable future, every building is a green building."

SunPower is a major manufacturer and distributor of high energy solar electric modules for roof top and utility scale energy systems. It is also the developer of the California Valley Solar Ranch.
